

Manjuri Choudhury

Front-End Engineering Leader | UI Architect | Enterprise UI & Design Systems Specialist

To lead enterprise UI architecture and front-end transformation initiatives, driving scalable, secure, and high-performance digital experiences aligned with business strategy.

PROFILE SUMMARY

- Vision-driven Strategic Front-End Engineering Leader** with 11+ years of experience delivering enterprise-scale web applications, UI architecture, and design-led transformation across aerospace & aviation supply chain, healthcare, insurance, and inventory systems.
- Innovation-focused AI contributor**, with hands-on experience in Generative AI, automation & ongoing upskilling in SAP UI5 & SAP Fiori for enterprise UI expansion.
- Execution-oriented leader**, currently heading UI engineering for a global aerospace platform, managing 12+ engineers and driving end-to-end architecture and Agile delivery aligned to business goals.
- Technically advanced front-end expert** skilled in React, Angular, Vue.js, TypeScript, Gen AI, AI tool like Cursor AI, Claude AI, Nodejs, Rxjs and React Native, building scalable, modular, high-performance applications using component-driven architecture.
- Strong web technology expertise** across HTML5, CSS3, JavaScript (ES6+), Node.js, GraphQL, RxJS, SASS/LESS, and responsive design, with proven capability in design systems and reusable component libraries using Storybook.
- Standardization-focused engineer**, driving UI consistency and developer efficiency through scalable design systems and component libraries.
- Integration-focused specialist** with expertise in API-driven development, enabling seamless system integration and real-time data exchange.
- Security & performance-driven**, implementing OAuth 2.0, JWT, RBAC, and optimizing application speed, responsiveness, and cross-platform compatibility.
- Performance-oriented and quality-driven**, specialized in performance engineering and responsive design, optimizing application speed, rendering efficiency, and cross-platform compatibility. **User-centric and accessibility-focused**, ensuring inclusive, intuitive, and high-adoption user experiences.
- Agile practitioner**, experienced in Scrum delivery, sprint execution, backlog management & stakeholder collaboration. **Transformation-driven leader**, delivering UI modernization & workflow automation to enhance efficiency & usability.
- Technically versatile and full-stack aware**, hands-on **exposure to Golang** and working knowledge of Node.js, GraphQL, and PostgreSQL, enabling effective full-stack collaboration and end-to-end solution delivery.

CAREER TIMELINE

EDUCATION

- M.Sc. in Information Technology** – Sikkim Manipal University (2010)
- B.Tech. in Information Technology** – NIIT (2006–2008)

CERTIFICATIONS

- Generative AI & AI Development (OpenAI ChatGPT, Gen AI, AI for Everyone, AI for Business Applications)
- Agentic AI, RAG & Advanced AI Systems (IBM RAG & Agentic AI, Agentic AI)
- AI Coding & Developer Tools (Lovable, Cursor AI, Crew AI, Claude, GitHub Copilot, Vibe Coding with Claude & Copilot)
- AI for Developers & Platforms (Gen AI for Developers, DevOps, Mobile Development)
- Automation & AI Productivity (Automation for Everyone, Automated Report Generation)
- Front-End Development (Meta Front-End Developer Certification)
- UI/UX Design Certification
- Version Control (Git & Collaboration)

CORE COMPETENCIES

- Front-End Engineering & UI Architecture
- UI/UX Engineering & Design Systems
- Enterprise Web Application Development
- Component-Based Architecture & Reusable Frameworks
- UI Modernization & Digital Transformation
- API-Driven Development & System Integration
- Data-Driven UI & Real-Time Interfaces
- Performance Optimization & Responsive Design
- Application Security & Access Control (OAuth 2.0, RBAC)
- Web Accessibility & Usability Engineering (WCAG)
- Agile & Scrum Delivery Management
- Stakeholder Management & Product Alignment
- Cross-Functional Leadership & Team Mentorship
- Requirement Analysis & Product Strategy
- Testing, Debugging & Quality Assurance

TECHNICAL SKILLS

Languages & Web Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, Nodejs

Frameworks & Libraries: React, Angular, Vue.js, SAP UI5, SAP Fiori, Cursor AI, Github Copilot, Mocha, Jest, Microfront end Architecture, GO Lang, Java

AI Tools: Cursor AI, Claude AI, Gemini AI, ChatGPT, Github Copilot, Gen AI, MCP

Styling & Design: SASS, LESS, Responsive & Mobile-First Design, Tailwind CSS, Figma, Invision

Component Development: Design Systems, Component Libraries, Storybook

API & Integration: RESTful APIs, API Consumption & Integration

Security Implementation: OAuth 2.0, JWT, Role-Based Access Control (RBAC)

Performance Engineering: Optimization, Rendering Efficiency, Cross-Browser Compatibility

Testing & Debugging: Manual & Automated Testing, Debugging Tools

Version Control & Collaboration: Git (branching, code reviews, workflows)

Database Exposure: PostgreSQL (queries, schema interaction)

WORK EXPERIENCE

Sr. Software Engineer – UI Lead | GE Aerospace | 1Fleet Asset (1FA) | Since Feb 2017

Key Responsibilities:

- Leading UI/UX for GE Aerospace's 1Fleet Asset (1FA) platform enabling real-time aircraft engine lifecycle tracking, compliance, and predictive maintenance for engineering and operations teams.
- Team Leadership:** Led cross-functional UI/UX team; improved productivity by **30%** through stronger design and engineering practices.
- Roadmap Collaboration:** Partnered with product teams to define priorities and roadmaps; increased delivery velocity by **30%**.
- User Research & UX Improvement:** Conducted usability testing and research; improved user satisfaction by **25%** through iterative enhancements.
- Design System & Reusability:** Built scalable UI component library and design system; reduced design-to-dev cycle time by **20%**.
- Accessibility Compliance:** Implemented WCAG 2.1 standards, expanding accessibility coverage across key application areas.
- Responsive UI Development:** Delivered cross-browser, responsive interfaces ensuring consistent multi-device experience.
- Component Documentation:** Introduced Storybook for UI components, improving reuse and accelerating onboarding.
- Performance Optimization:** Enhanced front-end performance via asset compression and code optimization; reduced load time by **25%**.
- Security Implementation:** Implemented OAuth 2.0 and RBAC, strengthening authentication and access control.
- Persona-Based Access:** Collaborated with auth teams to enable role-based personalized user experiences.
- API Integration:** Integrated RESTful APIs with backend systems, improving responsiveness and data flow.
- Quality Assurance:** Led manual and automated testing; reduced defects and improved system reliability.
- Requirement Translation:** Converted business and technical needs into execution plans; enabled **20% faster delivery**.
- Agile Leadership:** Served as Scrum Master, improving sprint execution and boosting team velocity by **30%**.

Key Achievements:

- Error Reduction:** Streamlined UI workflows reducing manual data entry errors by **40%**.
- User Engagement:** Improved interaction design, increasing user satisfaction by **25%**.
- Design System Impact:** Developed enterprise design system reducing development time by **30%**.
- Retention Improvement:** Enhanced API-driven experience contributing to **20% increase in user retention**.

Software Engineer | Cognizant | Feb 2015 – Jan 2017

Web & UI Development | Insurance & Inventory Systems

Key Responsibilities:

- Stock Management UI Development:** Led responsive front-end development for stock management system using AngularJS, JavaScript, HTML5, and LESS across mobile, tablet, and desktop.
- Real-Time Inventory Tracking:** Enabled global inventory tracking for electronics with order backlog, delivery monitoring, and analytics dashboards.
- Insurance Platform Modules:** Developed core modules for insurance platform including onboarding, dependent tracking, coverage management, and claims processing.
- UX & Accessibility Enhancement:** Improved usability with intuitive UI design and WCAG compliance, increasing operational efficiency.
- API Integration:** Integrated RESTful APIs for real-time data updates and seamless front-end/back-end communication.
- Stakeholder Collaboration:** Worked with UI/UX teams and stakeholders to deliver pixel-perfect, business-aligned interfaces.
- Quality Assurance:** Performed cross-browser testing, debugging, and validation to ensure high-performance, stable applications.

Software Engineer | Sapient Global Markets | Jul 2014 – Feb 2015

Front-End Development | Pharmaceutical Inventory Management

Key Responsibilities:

- Responsive Stock System Development:** Built responsive medicine stock management system using AngularJS, JavaScript, HTML, and CSS.
- Dashboard Development:** Created interactive dashboards for inventory, regional sales, and order fulfillment visibility.
- Real-Time Inventory Modules:** Developed real-time tracking for stock levels, backlog, and deliveries to improve operational planning.
- Accessible UI Delivery:** Delivered WCAG-compliant, mobile-first interfaces for improved usability and accessibility.
- API Integration:** Implemented RESTful APIs for real-time data updates and dynamic UI behavior.
- UI Collaboration:** Translated wireframes into production-ready UI in collaboration with designers and stakeholders.
- Cross-Platform Testing:** Ensured consistent performance across browsers and devices through rigorous testing and debugging.

Software Engineer | Brillio | Jun 2012 – Jun 2014

Web Development | Network Service Management – Verizon

Key Responsibilities:

- Network Tracking System:** Built web-based network tracking application for monitoring Verizon internet, wireless, wireline, and security services.
- Service Dashboard Development:** Developed centralized dashboard for service lifecycle tracking, issue resolution, and reporting.
- UI Development:** Used AngularJS, JavaScript, HTML5, CSS3 to build scalable and high-performance web applications.
- Real-Time API Integration:** Integrated REST APIs for live service status updates and improved system responsiveness.
- Responsive & Accessible UI:** Designed WCAG-compliant responsive interfaces ensuring cross-device usability.
- Testing & Debugging:** Conducted cross-browser testing to ensure stable, consistent application performance.
- Stakeholder Collaboration:** Worked closely with UX teams and business stakeholders to align solutions with enterprise goals.

PORTFOLIO & AI PROJECT DEMONSTRATIONS

- Front-End Leadership Portfolio:** <https://frontend-lead-portfolio.vercel.app/>
- AI Dashboard (Data Visualization & Insights):** <https://ai-dashboard-qzao.vercel.app/>
- AI Predictive Search Application:** <https://ai-predictive-search.vercel.app/>
