EDUCATION

M.Sc. (Information Technology), Sikkim Manipal University (SMU), 2010

B.Tech. (Information Technology), NIIT, 2006–2008

CORE COMPETENCIES

- UI/UX Design & Development
- Responsive & Mobile-First Design
- Design Systems & Style Guides
- Usability & Accessibility (WCAG Compliance)
- Agile & Scrum Methodologies
- Scrum Theory
- Stakeholder & Cross-Functional Collaboration
- Team Leadership & Mentorship
- Requirement Analysis & Product Strategy
- Project Management

SOFT SKILLS

- Analytical & Creative Problem Solving
- Visionary and Decision Making
- Leadership and Delegation
- Good Listener & Communicator
- Negotiation & Conflict Management
- High Business Ethics & Trustworthy
- Team Building & Interpersonal Skills

PROFILE SUMMARY

- Seasoned **Front-End Engineer/Engineering Leader** with over **a decade of experience** in **UI/UX design**, **web application development**, and **cross-functional leadership** across product-driven environments in industries such as **aerospace**, **telecommunications**, and **healthcare technology**. Brings a unique career trajectory that began in **UI/UX design** and evolved into **front-end development leadership**, enabling the delivery of highly **user-centric**, **responsive**, and **accessible digital experiences**.
- Proven expertise in architecting and building **enterprise-grade applications** using modern **JavaScript frameworks** including **VueJs**, **ReactJs**, **React Native, Typescript** and **Angular, RxJS**, along with proficiency in **HTML5**, **CSS3**, **JavaScript (ES6+)**, **LESS**, **SASS**, **Responsive Web Design, Email Template, Node.js, GraphQL** and **Ionic**. Demonstrates strong command over **design systems**, having developed scalable **component libraries** and integrated **Storybook** to streamline UI consistency and improve developer onboarding.
- Currently leading multiple high-impact projects as a **UI Lead** in a global product ecosystem, managing over **20 front-end engineers and interns** across parallel development streams. Responsible for aligning technical execution with business priorities and user expectations by driving **requirement analysis**, **solution design**, and **agile delivery workflows**. Acts as a liaison between **stakeholders**, **business analysts**, and **engineering teams** to ensure the successful translation of user needs into scalable web applications.
- Skilled in **RESTful API integration**, **OAuth 2.0 authentication**, and **Role-Based Access Control (RBAC)**, with exposure to **PostgreSQL** for front-end data interaction and over a year's experience with **Golang** to support full-stack coordination. Recognized for implementing **cost-optimization strategies** by automating previously manual data workflows, reducing errors, and significantly **improving processing times by 10%** through intuitive, digital interfaces.
- An **Agile practitioner and Scrum Master**, with a proven ability to lead **sprint planning**, **daily stand-ups**, and **retrospectives**, ensuring on-time and efficient feature rollouts. Plays a critical role in conducting **usability testing**, enforcing **WCAG-compliant accessibility standards**, and integrating **continuous stakeholder feedback** to refine digital solutions iteratively.
- Demonstrates a deep understanding of **responsive design principles**, **cross-browser compatibility**, and **performance optimization techniques**, delivering consistent and high-quality user experiences across all devices and platforms. Actively engages in **mentoring**, **code reviews**, and **technical enablement** initiatives, fostering a collaborative and high-performance development culture.
- Academically qualified with a **Master's and Bachelor's degree in Information Technology**, and further strengthened by internal certifications in **AWS**, **Vue.js**, and **Vuex**. Exploring leadership opportunities such as **UI Architect**, **UX Strategist**, or **Senior UI Lead**, with a preference for **product-based organizations** that value strategic UI thinking, technical leadership, and design innovation.

WORK EXPERIENCE

Sr Software Engineer - UI Lead | GE Aerospace | Program: 1Fleet Asset (1FA) | Since Feb 2017

Spearheading UI/UX initiatives for 1Fleet Asset (1FA), GE Aerospace's core system for end-to-end engine asset lifecycle tracking. Empowering engineering and operations teams by delivering high-fidelity, real-time asset intelligence that drives compliance, performance analysis & predictive maintenance planning.

Role:

- Leading and mentoring a cross-functional team of UI/UX engineers and designers, increasing team **productivity by 30%** and promoting best practices in design and front-end architecture.
- Partnering with product managers and stakeholders to define project roadmaps and feature priorities, improving delivery **velocity by 30%;** aligning solutions with business goals and user needs.
- Conducting user research, usability testing, and heuristic evaluations; iteratively enhancing workflows and **improving user satisfaction scores by 25%.**
- Developing and maintaining a reusable UI component library and scalable design system, reducing design-to-dev **turnaround time by 20%** and ensuring consistent brand implementation.
- Implementing WCAG 2.1 standards across interfaces, increasing accessibility **coverage to 10% of application views** and expanding reach to a broader user base.
- Designing and implementing responsive, device-agnostic layouts with full cross-browser compatibility, improving usability across multiple environments and platforms.
- Integrating and maintaining Storybook to document reusable components, accelerating new developer onboarding and ensuring uniformity across development teams.
- Enhancing front-end performance by compressing assets, refining CSS/JS, and optimizing rendering paths—**reducing page load time by 25%.**
- Deploying OAuth 2.0-based authentication and a Role-Based Access Control (RBAC) system, strengthening application security posture and streamlining access management.

TECHNICAL SKILLS

Languages & Frameworks
HTML5, CSS3, JavaScript (ES6+), LESS, SASS
React, Angular, Vue.js

Component Development & Documentation
Storybook – for UI component isolation, reusability, and documentation.

RESTful API Integration
Experienced in consuming APIs for dynamic, interactive front-end experiences.

Authentication & Authorization
Implemented secure protocols including OAuth 2.0 and Role-Based Access Control (RBAC).

Performance Optimization
Focused on enhancing speed, responsiveness, and overall application performance.

Version Control & Collaboration Tools
Git – proficient in branching strategies, code reviews, and team collaboration workflows.

Cross-Browser Compatibility
Ensures uniform performance and appearance across all major browsers.

Database Interaction
Familiar with PostgreSQL – for writing queries, managing schemas, and integrating front-end logic.

Web Accessibility
Deep understanding of accessibility standards (WCAG) and inclusive design practices.

Testing & Debugging
Comprehensive experience in manual and automated testing across devices and browsers.

CERTIFICATION DETAILS

- **Lovable certification**
- **Learn to code with AI certification**
- **Vibe coding with claude code certification**
- **Vibe coding with GitHub copilot certification**
- **Cursor AI certification**
- **Crew AI certification**
- **AI for everyone certification**
- **OpenAI Chat GPT certification**
- **Gen AI certification**
- **AI for business generation and prediction certification**
- **Automation for everyone certification**
- **Automatic report generation certification**
- **Claude certification**
- **Agentic AI certification**
- **IBM RAG and Agentic AI certification**
- **Gen AI for developers certification**
- **Gen AI for Devops certification**
- **Gen AI for mobile developers certification**
- **Meta Frontend Developer certification**
- **UI_UX certification**
- **Version Control certification**

- Collaborating with the centralized Auth team to enforce persona-specific access and permissions, personalizing the user experience while ensuring compliance.
- Integrating RESTful APIs to extend functionality and improve responsiveness, while partnering with back-end engineers to ensure seamless data exchange and feature alignment.
- Performing extensive manual and automated testing; identifying and resolving defects to maintain high application reliability and user confidence.
- Analyzing and translating stakeholder and technical requirements into actionable development plans, **directly contributing to on-time project delivery by 20%.**
- Serving as Scrum Master, driving agile ceremonies, eliminating blockers, and improving sprint efficiency and **team velocity by 30%.**

Highlights:

- Successfully led the development of a user interface that streamlined data entry processes, **resulting in a 40% reduction in manual errors and** significantly improving operational efficiency.
- Enhanced user engagement by implementing dynamic and responsive user interactions, leading to a **25% increase in user satisfaction ratings.**
- Achieved recognition for developing a robust design system that **reduced development time by 30%,** allowing for faster feature delivery across multiple projects.
- Played a pivotal role in integrating RESTful APIs, which improved application interactivity and user experience, **contributing to a 20% increase in user retention.**

Software Engineer | Cognizant | Feb 2015 - Jan 2017

Web & UI Application Development | Insurance & Inventory Systems

Role:

- **Led front-end development** for a responsive Stock Management System using AngularJS, JavaScript, HTML5, and LESS, optimized for cross-device compatibility (mobile, tablet, desktop).
- **Enabled real-time inventory tracking** for manufactured electronics across global markets, integrating features for order backlog management, delivery monitoring, and centralized analytics.
- **Contributed to a scalable insurance management platform**, developing key modules for policyholder onboarding, dependent tracking, coverage status, and end-to-end claims processing.
- **Enhanced user experience** through intuitive UI design, accessibility compliance (WCAG), and dynamic client-side interactivity, resulting in improved usability and operational efficiency.
- **Integrated RESTful APIs** for seamless front-end/back-end communication, enabling real-time data rendering and ensuring application responsiveness.
- **Collaborated cross-functionally** with UI/UX teams and stakeholders to translate business needs into pixel-perfect designs, ensuring alignment with branding and user goals.
- **Ensured product quality** through comprehensive testing, debugging, and validation across browsers and devices, delivering high-performing, reliable web applications.

Software Engineer | Sapient Global Markets | Jul 2014 - Feb 2015

Front-End Development | Pharmaceutical Inventory Management

Role:

- **Designed and developed** a responsive Medicine Stock Management System using JavaScript, HTML, CSS, and AngularJS, ensuring seamless usability across mobile, tablet, and desktop platforms.
- **Built interactive dashboards** to track pharmaceutical inventory, sales by region, and order fulfillment status, improving global distribution visibility and supply chain efficiency.
- **Implemented real-time inventory modules** for tracking manufactured quantities, available stock, backlogs, and pending deliveries—enhancing planning and operational agility.
- **Delivered high-quality front-end components** aligned with WCAG standards and mobile-first design principles, resulting in accessible and intuitive user experiences.
- **Integrated RESTful APIs** to support real-time data updates and streamline front-end/back-end communication for dynamic application functionality.
- **Collaborated with UI/UX designers and stakeholders** to transform wireframes into production-ready, brand-consistent UI components; iterated based on usability feedback and business needs.
- **Ensured cross-platform reliability** through comprehensive testing, debugging, and validation, maintaining performance consistency across devices and browsers.

Software Engineer | Brillio | Jun 2012-Jun 2014

Web Application Development | Network Service Management – Verizon

Role:

- **Designed and built a web-based Network Tracking Application** for Verizon to monitor internet, wireless, wireline, and security service performance, enhancing operational visibility and customer experience.
- **Developed a centralized dashboard** for tracking service delivery, issue resolution, and lifecycle management across diverse network services, streamlining service operations and reporting.
- **Utilized modern front-end technologies** including JavaScript, AngularJS, HTML5, CSS3, and component-based frameworks to create a scalable, maintainable, and high-performance application.
- **Integrated RESTful APIs** for real-time service status updates and dynamic data handling, improving system responsiveness and interactivity.
- **Created responsive, accessible UIs** aligned with WCAG standards, ensuring seamless performance across devices and inclusivity for users with varying needs.
- **Conducted cross-platform testing and debugging**, delivering a consistent, high-quality user experience across browsers and devices.
- **Collaborated with UX/UI designers and business stakeholders** to align technical solutions with Verizon's strategic goals, continuously iterating based on user feedback and operational needs.

PERSONAL DETAILS

Languages Known: English & Hindi
Address: Bangalore
